

Restaurant Washrooms

Hakkasan

Establishing itself as the premier destination for modern Cantonese cuisine in London, Hakkasan opened its second London restaurant in Mayfair. Hakkasan Mayfair complements the Hanway Place flagship, and spans two floors for up to 220 guests, plus a private dining room.

Plasma Clean were approached by Hakkasan to discuss the problem of potential odours in the restaurant washrooms. Hakkasan decided to install Plasma Clean's Ambion, which works by ionising ambient air to break down odour molecules. Since installation, the Ambion ioniser has lived up to its market-leading reputation, keeping the washroom air fresh and free from odour.

The Ambion product range can be used for a variety of applications including washrooms, food waste storage and disinfection.
