

Plasma Clean. Ambion 15

The Ambion 15 provides affordable, reliable and supremely effective odour control for washrooms. Units feature a powerful ioniser, which destroys odours and disinfects air by destroying airborne bacteria, viruses and spores. The process keeps air in the washroom fresh, clean and hygienic.

Simple to install, with low maintenance and running costs, this versatile modular solution provides affordable and reliable odour and infection control, making it the perfect partner for a wide range of applications.

Ambion 15 units use plasma ionisation technology to create high levels of charged ions.

These ions then disinfect the ambient air by neutralising odours and destroying airborne infection.

Ambion 15. Product Specification	
Room Area	Treats up to 15m ²
Power Consumption	Up to 5W
Power Supply	230V/ 1 ph / 50Hz
Negative Ion Output	50,000pcs / cm ³
Size H x D x L	175 x 95 x 120 mm
Weight	0.5 kg
