

food waste... food waste... food waste...
into grey water... into grey water...
into grey water...

DIGEST UP TO **180kg** OF FOOD WASTE TO GREY WATER IN **24 hrs**

Made in the UK, in Milton Keynes, with all the key components sourced locally – this saves money, increases efficiency and minimises waste – keeping its carbon footprint low.

- **Compact, on-site solution reduces food waste and reduces disposal costs – saves money**
- **Fewer collections mean fewer trucks**
- **Less waste to landfill improves carbon footprint**
- **Good for the environment**

Food is digested to grey water – NOTHING is left

Easy to use & maintain – no specialised training or servicing required

Additional benefits...

- Reduces odour and vermin problems
- Encourages proper waste stream separation & recycling
- Reduces waste collection traffic
- 'Future Proofs' operations against increasing food waste collection charges
- Saves space
- Low energy usage, only requires 13-amp connection
