Plasma Clean are continuing to make their mark on a global scale, and have now successfully secured MGK([www.mgk.ae](http://www.mgk.ae)) as their official distributor for the Plasma Clean products within the Gulf Corporation Council (GCC).

MGK are rapidly establishing a strong presence for the Plasma Clean brand and product range within the GCC, especially focusing on the ever expanding Dubai infrastructure.

David Glover, Founder of Plasma Clean says *"There is a fantastic opportunity for Plasma Clean in the GCC, and I am confident that MGK are the ideal partner to help make us a success in this market. Having recently been over to Dubai, I can see how our technology will help improve the air quality in and around existing and new developments, and I am looking forward to working with MGK in the long into the future."*

MGK was established in the GCC in 2004 and has been supplying to the food service industry ever since. Mirco Beutler, the founder of MGK added *"The Plasma Clean products are by far the best odour and grease control solution on the market, and I have every confidence that as soon as the first application is installed, demand will rocket."*

Plasma Clean are continually looking for opportunities in other countries where odour, grease and smoke control is an issue. So if there is a business out there who could help spread our wings further, please drop us a line 00971 50 8525900 or e mail [info@mgk.ae](mailto:info@mgk.ae)
